DDR4 GAMING DARK ROG

T-Force │ DDR4 Dark ROG

T-FORCE
GAMING DDR4 DARK ROG

ROG CERTIFIED
ROG certified memory with exceptional performance

Team Group T-FORCE Dark memory with the classic Mayan style designed and passed the ROG stress tests named T-FORCE Dark ROG overclocking module. With ROG motherboard's optimizing Ai overclock tuner function, it can enhance the overclocking performance of the memory. Easy breezy overclock immediately.

*This function requires the latest BIOS version.

Selected high quality

Samsung

Original IC chips

Team Group insists on using high quality Samsung Original IC chips and passed through various rigorous internal tests. Its high reliability makes players feel at ease.
Awesome knight armor
style heat spreader

The Team Group design team had built a heat spreader with an all new exterior design concept. The vigorous look of top notch armor style spreader transforms the memory device of the computer hardware into a valiant dark knight riding a dark horse.
With complete coverage
design and improve 8%
radiating performance

The design of DDR 4 Dark heat spreader surpasses DDR 3 Dark's. The heat spreader area is extended to the top and the two sides. Double layer heat spreader offers memory a better protection. Complete coverage of the memory not only can enhance the radiating performance and maintain the system a long time stable operation, but also can solve the problem of overheating.

The Only 4-piece heat spreader in the market

Other than the two-piece or three-piece heat spreader with cover on the market, Team Group releases the only four-piece heat spreader in the industry. Upper and lower layers are used to create a design texture of crossed lines and the killer look of a dark knight's armor. It is both unique and eye catching.

Ultra low working voltage Save energy up to 40%

With low working voltage 1.2V~1.4V from DDR4 Dark ROG, it is not only energy saving but it can also reduce the temperature and the heat generated to offer the high speed running memory a stable and long time operation.

XMP 2.0 1 step overclocking technology

All Dark ROG series support Intel XMP 2.0. It is only one step away to experience the high speed sensation of overclocking.

Main Feature

- ROG Certified
- Awesome knight armor style heat spreader
- Complete coverage of the top and both sides
- The Only four-pieces heat spreader in the market
- 1.2V~1.4V ultra low working voltage
- Support intel XMP 2.0 smart overclocking profile technology
- Selected high quality original IC chips
- Lifetime warranty

LIFE TIME WARRANTY

Specification

Item	Specification
Module Type	288 Pin Unbuffered DIMM Non ECC
Capacity	8GBx2
Frequency	3000
Data transfer bandwidth	24,000 MB/s (PC4 24000)
CL-Value	CL16-18-18-38
Voltage	1.35V
Heat Sink	Aluminum heat-sink
Operation System	Desktop or notebook computer with DDR4 Memory Slots Required OS: Windows 10 / 8.1 / 8 / 7 / Vista / XP
Warranty	Lifetime Warranty
